

This assignment is due Tuesday, July 7, 2020 at the beginning of class.

1. Compute the Jones polynomial of the trefoil knot oriented as in the picture below.

Lemmas

$$\bullet \langle \bigcirc \rangle = V + V^{-1}$$

$$\bullet \langle \bigcirc \bigcirc \rangle = (V + V^{-1})^2 = V^2 + 2 + V^{-2}$$

$$\begin{aligned} \bullet \langle \text{link} \rangle &= \langle \text{link} \rangle - V \langle \text{link} \rangle \\ &= (V + V^{-1}) - V(V + V^{-1})^2 \\ &= V + V^{-1} - V(V^2 + 2 + V^{-2}) \\ &= V + V^{-1} - V^3 - 2V - V^{-1} \\ &= -V^3 - V =: P_1(V) \end{aligned}$$

$$\begin{aligned} \langle \text{trefoil} \rangle &= \langle \text{trefoil} \rangle - V \langle \text{trefoil} \rangle = \langle \text{trefoil} \rangle - V \langle \text{trefoil} \rangle \\ &= \langle \text{trefoil} \rangle - V \langle \text{trefoil} \rangle - V \left[\langle \text{trefoil} \rangle - V \langle \text{trefoil} \rangle \right] \\ &= \langle \text{trefoil} \rangle - V \langle \text{trefoil} \rangle - V \left[\langle \text{trefoil} \rangle - V(V + V^{-1}) \langle \text{trefoil} \rangle \right] \\ &= \left[\langle \text{trefoil} \rangle - V \langle \text{trefoil} \rangle \right] - V P_1(V) - V \left[P_1(V) - V(V + V^{-1}) P_1(V) \right] \\ &= \left[(V + V^{-1})^2 - V(V + V^{-1}) - V P_1(V) \right] - \left[P_1(V) (V - V^2(V + V^{-1})) \right] \\ &= \left[V^4 + V^2 + 1 + V^{-2} \right] - \left[V^6 + V^4 \right] \\ &= -V^6 + V^2 + 1 + V^{-2} \end{aligned}$$

$$\Rightarrow \begin{matrix} n_+ = 3 \\ n_- = 0 \end{matrix}$$

$$\Rightarrow \underline{J(\mathcal{B})} = (-1)^0 V^{3-2 \cdot 0} \langle \mathcal{B} \rangle$$

$$= V^3 (-V^6 + V^2 + 1 + V^{-2})$$

$$= -V^3 + V + V + V$$
