1 | Exercises

Exercise 1.1 (Gathmann 2.17).
Find the irreducible components of

$$V(x - yz, xz - y^2) \subset \mathbb{A}^3/\mathbb{C}.$$

Exercise 1.2 (Gathmann 2.18).
Let $X \subset \mathbb{A}^n$ be an arbitrary subset and show that $V(I(X)) = \overline{X}$.

Exercise 1.3 (Gathmann 2.21).
Let $\{U_i\}_{i \in I} \rightrightarrows X$ be an open cover of a topological space with $U_i \cap U_j \neq \emptyset$ for every i, j.

a. Show that if U_i is connected for every i then X is connected.

b. Show that if U_i is irreducible for every i then X is irreducible.

Exercise 1.4 (Gathmann 2.22).
Let $f : X \to Y$ be a continuous map of topological spaces.

a. Show that if X is connected then $f(X)$ is connected.

b. Show that if X is irreducible then $f(X)$ is irreducible.

Definition 1.0.1 (Ideal Quotient).
For two ideals $J_1, J_2 \trianglelefteq R$, the *ideal quotient* is defined by

$$J_1 : J_2 \coloneqq \left\{ f \in R \,\middle|\, f J_2 \subset J_1 \right\}.$$

Exercise 1.5 (Gathmann 2.23).
Let X be an affine variety.

a. Show that if $Y_1, Y_2 \subset X$ are subvarieties then

$$I(\overline{Y_1 \setminus Y_2}) = I(Y_1) : I(Y_2).$$

b. If $J_1, J_2 \trianglelefteq A(X)$ are radical, then

$$\overline{V(J_1) \setminus V(J_2)} = V(J_1 : J_2).$$

Exercise 1.6 (Gathmann 2.24)**.**
Let $X \subset \mathbb{A}^n$, $Y \subset \mathbb{A}^m$ be irreducible affine varieties, and show that $X \times Y \subset \mathbb{A}^{n+m}$ is irreducible.
