# Interesting Topological Spaces in Algebraic Geometry

## D. Zack Garza

# Monday 27<sup>th</sup> July, 2020

#### **Contents**

1	Ideas for Spaces	1
2	Part 2	1
3	Part 3	1
4	Part 4	2

## 1 Ideas for Spaces

- Fake projective planes
- Conics
- Elliptic Curves
- Kahler Manifolds
- K3 Surfaces
- Del Pezzo surfaces
- Hurwitz schemes
- Topological galois groups, e.g.  $G(\overline{F}/F)$  for  $F = \mathbb{Q}, \mathbb{F}_p$ .
- Spec (R) for R a DVR (a Sierpinski space)
- Quiver Grassmannians
- Rigid analytic spaces

#### 2 Part 2

I don't quite know yet.

#### 3 Part 3

Some more stuff.

# 4 Part 4

Something else

Something

Something more.
